PROFESSIONAL SUMMARY

13 years’ experience in product development, designing applications and developing API’s. Writing quality, reusable code with end to end tests and striving for bug free programming. Worked with international teams under Agile methodology. In my free time, I like to compose music, play PC games and develop side projects related to AI, Android and IoT.

EXPERIENCE | 12.5 YEARS TOTAL

Vice President in Software Engineering | Blackrock | Gurgaon, India

10th Feb, 2025 – Present

Project: Post-Trade Cost Analytics (TCA) Platform - TAR

Asset Classes - Fixed Income | US Treasuries | GOVT Bonds | ETF

I am part of the Global Trading, Trading Analysis & Research team which provides post trade cost analytics metrics. Leading the data coverage and AI enablement initiative for the Trading Analysis & Research (TAR) product, integrating Generative AI and RAG-based pipelines to modernize post-trade cost analytics workflows. Enabled trading desks to interactively query post-trade data and retrieve metric summaries via natural language interfaces.

- Improved TCA metrics for various Fixed Income assets with 90% coverage eg. Volume, Implementation Shortfall, Execution Cost etc.
- Architected and deployed Retrieval-Augmented Generation (RAG) pipelines using vector databases and embedding generation for efficient semantic retrieval of trade analytics data.
- Developed OpenAI tool calling workflows via Azure OpenAI’s Chat Completions API, enabling traders to fetch TCA metrics through conversational prompts.
- Technologies: OpenAI API, Spring AI, Java 17, Python, Azure DevOps, Cosine Similarity Search, RAG Pipelines, Tool Calling, Post-Trade Analytics.

**Project: EQRD - Reference Data Modernization**

Contributed to the modernization of Equity Reference Data services for managing stocks, options, and warrant feeds. Led the design, implementation, delivering scalable, intelligent solutions for reference data management.

- Led the OpenID ADFS migration for legacy applications, enabling passwordless authentication and role-based access control aligned with enterprise security standards.
- Building Full stack application- OneBench which replaces legacy OneBench Screens.
  - Built important screens for the trader desk to manage - Hedge Fund/Series, Reference Data and Instrument screens etc.
  - Migrate users to the new UI while maintaining entitlements.
  - Implemented API Gateway utilizing Backends for Frontends design.
- Test driven development on Java Backend and React Frontend.
- Technologies: Java, Spring Boot, Microservices, React JS, Splunk, OpenID, Jenkins, CI/CD, Jest

**Senior Software Engineer | Ciena | Gurgaon, India**

July, 2016 – Jan, 2022

Worked in Microservice architecture where I was part of Agile Team, developed features under certain use cases for Ciena's Network Management System product - MCP & OneControl.

- Developed Features for Layer 1 Transport services network provisioning, discovery etc.
- Designed and coded application utilizing a test-driven development approach.
- Worked on different micro-services in different languages.
- Completed features with less or no bugs at all.
- Refactored existing code to make it more reusable and efficient.
- Technologies: Java, Ember.js, Python, Docker, Teamcity

**Software Engineer | Hughes Systique Corporation | Gurgaon, India**

Jan, 2016 – July, 2016

I worked as part of a team responsible for the development of the service portal for equipment order processing for Hughes Network.

- Quick Development of Portal and backend batch applications for order processing.
- Full Stack Development - From GUI to Database.
- I worked with a team in the US, where we developed and deployed applications in Production.
- Traveled to the US for 3 Months and collaborated with Team for faster development.
- Technologies: Java, PL/SQL, AJAX, Javascript

**Service Info Developer 1 - B | Hewlett Packard Enterprise | Bangalore, India**

Oct, 2012 – Jan, 2016

HPE managed American Airlines IT projects where I was part of a team which developed web services and backend apps for Customer Interaction.

- Contributed as an Individual, providing design and implementation of Web Services & backend applications.
- Used extensive Object-Oriented Programming skills to develop code which is scalable and easy to maintain.
- Tested via JUnit, Mockito, maintaining the code and scale the application after deployment.
- Traveled to US American Airlines Office for deployment assistance of web services.
- Technologies: Java, Spring, Hibernate, SOA, REST Web Services, JPA, IBM WebSphere
